**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 5-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/16/2005.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Johansson et al (3914478).

'478 teaches applying an EPM or EDPM interpolymers in an aqueous dispersion to a rubber tire to protect it against ozone and weathering. There is no functionalizing pretreatment of the tire first (1:6-2:8).

Art Unit: 1762

4. Claims 1-4 and 25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Patitas et al (5491591).

'591 teaches coating a water dispersion of polyurethane on a tire to form a protective dry film coating (1:8-5:48). The coating formulation may contain defoamer and other additives (see Example 3). The defoamer is identified as a paraffin oil based material, i.e. a non-silicone defoamer. There is no functionalizing pretreatment of the tire.

5. Claims 1-2 and 25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 64-000171.

'171 teaches a lustering and protecting coating for tires that is dispersion of urethane or other polymers in water (or other solvents) (see Abstracts).

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

7. Claims 1-2 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by WO 01/94453.

'453 teaches applying an aqueous dispersion of polyurethane to a tyre as an ozone protectant (see abstract; US 2003/0127170 may serve as translation of WO 01/94553)

***Claim Rejections - 35 USC § 112***

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1-4 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Claim 1: resilient and glossy have not been defined, and are therefore vague. How glossy must the coating be? How resilient?

b) Claim 25: there is no antecedent basis for the elastomers.

***Specification***

10. The title of the invention is not consistent.

The cover sheet shows Aqueous based, whereas page 1 and the Abstract shows Aqueous-based. One consistent title should be used throughout.

***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 1762
